

**Name:** Karthik Iyer  
**Email:** karthik.iyer@email.com  
**Phone:** +91 2109876543

**Objective:**

Blockchain Developer with expertise in smart contract development and decentralized applications. Passionate about leveraging blockchain for secure, transparent, and decentralized solutions.

**Education:**

- B.Tech in Computer Science, Manipal University (2020-2024)

**Skills:**

- Blockchain: Solidity, Ethereum, Hyperledger, Web3.js
- Programming: JavaScript, Python, Rust
- Security: Smart Contract Auditing, Cryptography

**Projects:**

- **Decentralized Voting System:** Built a blockchain-based voting system on Ethereum.
- **NFT Marketplace:** Developed a marketplace for digital art trading with ERC-721 tokens.
- **Supply Chain Tracking:** Implemented a Hyperledger-based solution for tracking product authenticity.

**Certifications:**

- Ethereum Developer Certification
- Blockchain Specialization – Coursera

**Internship Experience:**

- **Blockchain Developer Intern at ConsenSys (2023)**
  - Developed Solidity smart contracts for DeFi applications.
  - Audited smart contracts, identifying and fixing security vulnerabilities.

**Achievements:**

- Presented research on "Scalable Blockchain Solutions" at Blockchain Expo 2023.
- Built an open-source Solidity library used by 100+ developers.
